CS-230 Group 36
Meeting Minutes - Week 4

Date and Time

Friday 15th November 2019
Meeting began at 13:15 and ended at 11:50

Attendance

- Samuel Roach
- Blake Davies
- George Carpenter
- Angelo Balistoy
- Ioan Mazurca
- Chukwuka Ajeh

Topics

- Java 8 will be used, people are free to run Java other versions but no concessions will be made

- IntelliJ will be our IDE of choice, chosen for it's built in Git support

Progress

- George has already laid out some skeleton classes with empty methods that need filling

- Theme was decided as a Sci-Fi Jungle Explorer with "Alien Vs Predator" potential

- George showed people how to use IntelliJ with git, so as to try and reduce confusion over the coming weeks

To-do

- For people writing classes

  - Everyone should commit to their own branch
  - Merge to your own branch from master
  - Merges to master to be carried out my a secondary individual, so that the code is confirmed as good by both 2 parties

- By the end of next week 2 classes should be fully implemented by each person

- Javadoc should be completed or mostly done for these classes

- People should get to know JavaFX

- We suggest that Blake should be head of aesthetic design as he is possibly the most artistic

- People should make it clear which classes they wish to implement as to make sure this is not confused between people

Next Meeting

- Wednesday 20th November
  - This will be another informal catch up meeting
- Friday 22nd November
  - This will our standard weekly meeting
- Friday 22th November
  - This will our fortnightly meeting with Monika, our Academic Mentor
